International application No.

INTERNATIONAL SEARCHING AUTHORITY WRITTEN OPINION OF THE

PCT/IL05/00136

The figure of this parison that the continuous proposes of this opinion in the language, dut to basis of this basis of the international application in the language, duts opinion has been established in which it was filled in the international application into mirroulous application in the international propriate and the basis of a translation of the international propriate of the international propriate of the international propriate of \$2.1(0). 2. With regard to any nucleotide and/we amine acid sequence disclosed in the international application and necessary to the delimed a threat of the propriate of the p	PCT/ISA/237(Box No. I) (April 2005)	Form
I. With regard to the language, this opinion has been established on the basis of: The infermational application in the language in which it was filled a translation of the international application into which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). The infermational search (Rules 12.3(a) and 23.1(b)). With regard to any nucleotide and/or animo acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: A type of material a sequence listing a sequence listing Included to the international application as filled. Included to gether with the international application in electronic form. Included to gether with the international application in electronic form. Included the objectment of this Authority for the purposes of search. Included the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filled or does not go beyond the application as filled, as appropriate, were funnished. In addition, in the case that more version or copy of a sequence listing and/or table(s) relating the required in the information in the subsequent or additional copies is identical to that in the part in the case that more version or copy of a sequence listing were funnished.		
I. With regard to the language, this opinion has been established on the basis of: The infermational application in the language in which it was filled a translation of the international application into which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). The infermational search (Rules 12.3(a) and 23.1(b)). With regard to any nucleotide and/or animo acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: A type of material a sequence listing a sequence listing Included to the international application as filled. Included to gether with the international application in electronic form. Included to gether with the international application in electronic form. Included the objectment of this Authority for the purposes of search. Included the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filled or does not go beyond the application as filled, as appropriate, were funnished. In addition, in the case that more version or copy of a sequence listing and/or table(s) relating the required in the information in the subsequent or additional copies is identical to that in the part in the case that more version or copy of a sequence listing were funnished.		
I. With regard to the language, this opinion has been established on the basis of: The infermational application in the language in which it was filled a translation of the international application into which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). The infermational search (Rules 12.3(a) and 23.1(b)). With regard to any nucleotide and/or animo acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: A type of material a sequence listing a sequence listing Included to the international application as filled. Included to gether with the international application in electronic form. Included to gether with the international application in electronic form. Included the objectment of this Authority for the purposes of search. Included the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filled or does not go beyond the application as filled, as appropriate, were funnished. In addition, in the case that more version or copy of a sequence listing and/or table(s) relating the required in the information in the subsequent or additional copies is identical to that in the part in the case that more version or copy of a sequence listing were funnished.		
I. With regard to the language, this opinion has been established on the basis of: The infermational application in the language in which it was filled a translation of the international application into which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). The infermational search (Rules 12.3(a) and 23.1(b)). With regard to any nucleotide and/or animo acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: A type of material a sequence listing a sequence listing Included to the international application as filled. Included to gether with the international application in electronic form. Included to gether with the international application in electronic form. Included the objectment of this Authority for the purposes of search. Included the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filled or does not go beyond the application as filled, as appropriate, were funnished. In addition, in the case that more version or copy of a sequence listing and/or table(s) relating the required in the information in the subsequent or additional copies is identical to that in the part in the case that more version or copy of a sequence listing were funnished.		
I. With regard to the language, this opinion has been established on the basis of: The infermational application in the language in which it was filled a translation of the international application into which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). The infermational search (Rules 12.3(a) and 23.1(b)). With regard to any nucleotide and/or animo acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: A type of material a sequence listing a sequence listing Included to the international application as filled. Included to gether with the international application in electronic form. Included to gether with the international application in electronic form. Included the objectment of this Authority for the purposes of search. Included the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filled or does not go beyond the application as filled, as appropriate, were funnished. In addition, in the case that more version or copy of a sequence listing and/or table(s) relating the required in the information in the subsequent or additional copies is identical to that in the part in the case that more version or copy of a sequence listing were funnished.		
I. With regard to the language, this opinion has been established on the basis of: The infermational application in the language in which it was filled a translation of the international application into which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). The infermational search (Rules 12.3(a) and 23.1(b)). With regard to any nucleotide and/or animo acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: A type of material a sequence listing a sequence listing Included to the international application as filled. Included to gether with the international application in electronic form. Included to gether with the international application in electronic form. Included the objectment of this Authority for the purposes of search. Included the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filled or does not go beyond the application as filled, as appropriate, were funnished. In addition, in the case that more version or copy of a sequence listing and/or table(s) relating the required in the information in the subsequent or additional copies is identical to that in the part in the case that more version or copy of a sequence listing were funnished.		
I. With regard to the language, this opinion has been established on the basis of: The infermational application in the language in which it was filled a translation of the international application into which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). The infermational search (Rules 12.3(a) and 23.1(b)). With regard to any nucleotide and/or animo acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: A type of material a sequence listing a sequence listing Included to the international application as filled. Included to gether with the international application in electronic form. Included to gether with the international application in electronic form. Included the objectment of this Authority for the purposes of search. Included the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filled or does not go beyond the application as filled, as appropriate, were funnished. In addition, in the case that more version or copy of a sequence listing and/or table(s) relating the required in the information in the subsequent or additional copies is identical to that in the part in the case that more version or copy of a sequence listing were funnished.		
I. With regard to the language, this opinion has been established on the basis of: The infermational application in the language in which it was filled a translation of the international application into which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). The infermational search (Rules 12.3(a) and 23.1(b)). With regard to any nucleotide and/or animo acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: A type of material a sequence listing a sequence listing Included to the international application as filled. Included to gether with the international application in electronic form. Included to gether with the international application in electronic form. Included the objectment of this Authority for the purposes of search. Included the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filled or does not go beyond the application as filled, as appropriate, were funnished. In addition, in the case that more version or copy of a sequence listing and/or table(s) relating the required in the information in the subsequent or additional copies is identical to that in the part in the case that more version or copy of a sequence listing were funnished.		
I. With regard to the language, this opinion has been established on the basis of: The infermational application in the language in which it was filled a translation of the international application into which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). The infermational search (Rules 12.3(a) and 23.1(b)). With regard to any nucleotide and/or animo acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: A type of material a sequence listing a sequence listing Included to the international application as filled. Included to gether with the international application in electronic form. Included to gether with the international application in electronic form. Included the objectment of this Authority for the purposes of search. Included the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filled or does not go beyond the application as filled, as appropriate, were funnished. In addition, in the case that more version or copy of a sequence listing and/or table(s) relating the required in the information in the subsequent or additional copies is identical to that in the part in the case that more version or copy of a sequence listing were funnished.		
1. With regard to the language, this opinion has been established on the basis of: A the international application in the language in which it was filled a translation of the international application into, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). International search (Rules 12.3(a) and 23.1(b)). With regard to may nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: With regard to may nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed a sequence listing a sequence listing b. format of material c imae of filling/furnishing c imae of filling/furnishing d		
1. With regard to the language, this opinion has been established on the basis of: A the international application in the language in which it was filled a translation of the international application into, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). International search (Rules 12.3(a) and 23.1(b)). With regard to may nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: With regard to may nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed a sequence listing a sequence listing b. format of material c imae of filling/furnishing c imae of filling/furnishing d		ļ
1. With regard to the language, this opinion has been established on the basis of: A the international application in the language in which it was filled a translation of the international application into, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). International search (Rules 12.3(a) and 23.1(b)). With regard to may nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: With regard to may nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed a sequence listing a sequence listing b. format of material c imae of filling/furnishing c imae of filling/furnishing d		
1. With regard to the language, this opinion has been established on the basis of: A the international application in the language in which it was filled a translation of the international application into, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). International search (Rules 12.3(a) and 23.1(b)). With regard to may nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: With regard to may nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed a sequence listing a sequence listing b. format of material c imae of filling/furnishing c imae of filling/furnishing d		
1. With regard to the language, this opinion has been established on the basis of: A the international application in the language in which it was filled a translation of the international application into, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). International search (Rules 12.3(a) and 23.1(b)). With regard to may nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: With regard to may nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed a sequence listing a sequence listing b. format of material c imae of filling/furnishing c imae of filling/furnishing d		
1. With regard to the language, this opinion has been established on the basis of: The international application in the language in which it was filled a translation of the international application in the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). The continuent of the international application into each established on the basis of: A type of material I able(s) related to the sequence listing I able(s) relating to the sequence listing I able(s) relating to the sequence listing I able(s) relating to the international application as filled. I able(s) relating the international application as filled. I able(s) relating the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filled I able(s) required statements that more than one version or copy of a sequence listing and/or table(s) relating therefore its identical to that in the table I able(s) required statements that more than one version or copy of a sequence listing and/or table(s) relating therefore the there is identical to that the there is the international copies is identical to that the there is the international copies in the sequence listing and/or table(s) relating the there is identical to that the there is the international copies in the sequence listing and or addition, in the case that more version or copy of a sequence listing and/or table(s) relating the table and the table and the table and the table and	dditional comments:	7 °t
1. With regard to the language, this opinion has been established on the basis of: The international application in the language in which it was filled a translation of the international application in the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). The continuent of the international application into each established on the basis of: A type of material I able(s) related to the sequence listing I able(s) relating to the sequence listing I able(s) relating to the sequence listing I able(s) relating to the international application as filled. I able(s) relating the international application as filled. I able(s) relating the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filled I able(s) required statements that more than one version or copy of a sequence listing and/or table(s) relating therefore its identical to that in the table I able(s) required statements that more than one version or copy of a sequence listing and/or table(s) relating therefore the there is identical to that the there is the international copies is identical to that the there is the international copies in the sequence listing and/or table(s) relating the there is identical to that the there is the international copies in the sequence listing and or addition, in the case that more version or copy of a sequence listing and/or table(s) relating the table and the table and the table and the table and	application as filed of does not go beyond the application as filed, as appropriate, were infinished.	
With regard to the language, this opinion has been established on the basis of: The international application in the language in which it was filled a translation of the international application into, which is the language of a translation funished for the purposes of international search (Rules 12.3(a) and 23.1(b)). With regard to any nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: A with regard to any nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed as a sequence listing	or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the	7.0

With regard to the language, this opinion has been established on the basis of: The international application in the language in which it was filled a translation of the international application into International search (Rules 12.3(a) and 23.1(b)). With regard to any nucleotide and/or anima acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: With regard to any nucleotide and/or anima acid sequence disclosed in the international application and necessary to the claimed A which regard to any nucleotide and/or anima acid sequence disclosed in the international application as sequence listing a sequence listing a sequence listing b format of material in electronic form c time of filling/furnishing c time of filling/furnishing c time of filling/furnishing c time of one international application as filed.	furnished subsequently to this Authority for the purposes of search.	
I. With regard to the language, this opinion has been established on the basis of: the international application in the language in which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). 2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed as sequence listing. 2. If you are the international application in the purposes of the purpose of material in electronic form in the sequence listing. 3. If you are the international application is the claimed in the sequence listing. 4. If you are the international application is the claimed in the international application and necessary to the claimed international application in the purposes of the purposes of the international application in the purposes of the international application in the purposes of	filed together with the international application in electronic form.	
I. With regard to the language, this opinion has been established on the basis of: The international application in the language in which it was filled at translation of the international application into, which is the language of a translation functional application into, which is the language of a translation functional application into, which regard to any nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: A with regard to any nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: A with regard to any nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed as sequence listing. A cornar of material	contained in the international application as filed.	
1. With regard to the language, this opinion has been established on the basis of: 2. With regard to the international application in the language in which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). 2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed as the continued on the basis of: 2. Or international application and necessary to the claimed international application and necessary to the claimed international application and necessary to the claimed as the international application and necessary to the claimed international application and necessary to the purpose of a translation in the international application in the purpose of a translation in the purpose of a translat	c. time of filing/furnishing	
1. With regard to the language, this opinion has been established on the basis of: 2. With regard to the international application in the language in which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). 2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed as the continued on the basis of: 2. Or international application and necessary to the claimed international application and necessary to the claimed international application and necessary to the claimed as the international application and necessary to the claimed international application and necessary to the purpose of a translation in the international application in the purpose of a translation in the purpose of a translat		
I. With regard to the language, this opinion has been established on the basis of: a translation of the international application in the language in which it was filled a translation of the international application into language in which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). 2. With regard to any nucleoride and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleoride and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleoride and/or amine acid sequence disclosed in the international application and necessary to the claimed 3. Type of material 3. Is sequence listing 4. In the sequence listing 5. In the sequence listing 6. In the sequence listing 7. In the international application and necessary to the claimed on the basis of: 8. In the international application for the sequence listing 9. In the international and in the particular and in the sequence listing.	nnot oinoutosic nin	
I. With regard to the language, this opinion has been established on the basis of: the international application in the language in which it was filled a translation of the international application into a translation action international application into 2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: a type of material a sequence listing a sequence listing Inable(s) related to the sequence listing	ou baber.	
I. With regard to the language, this opinion has been established on the basis of: the international application in the language in which it was filed a translation of the international application into, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). 2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 3. Type of material 3. Type of material 3. Type of material 3. Type of material	b. format of material	
I. With regard to the language, this opinion has been established on the basis of: the international application in the language in which it was filed a translation of the international application into, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). 2. With regard to any nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleotide and/or amine acid sequence disclosed in the international application function and necessary to the claimed invention, this opinion has been established on the basis of: 3. Type of material 3. Type of material		
I. With regard to the language, this opinion has been established on the basis of: a translation of the international application in the language in which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). 2. With regard to any nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. With regard to any nucleotide and/or amine acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: 2. Type of material	. Igrand	
I. With regard to the language, this opinion has been established on the basis of: the international application in the language in which it was filed a translation of the international application into, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)). 2.
